Focus of the Conference

The main asset of this concept is its significant influence through the creation of a new world dimension. The key features required for employing a large-scale IoT are low-cost sensors, high-speed and error-tolerant data communications, smart computations, and numerous applications. This research work is presented in four main sections, including a general overview of IoT technology, a summary of previous correlated surveys, a review regarding the main IoT applications.

The conference will cover the following areas:

- IoT Edge Devices & IoT Sensors
- Embedded & VLSI
- Artificial Intelligence in Communication Systems & Agriculture
- Signal and Image Processing
- Machine Learning & Deep Learning
- Health Care Applications
